Dear Home Lover:

The mellow September sunlight reminds us that it will soon be time to plant bulbs for early spring flowers. Those of us who have previously planted bulbs in fall know the keen enjoyment of the beautiful colors of Tulips, Narcissus, and Hyacinths in full bloom in early spring.

If you have not made a habit of planting fall bulbs, yet have always admired the early spring gardens, we particularly wish to say to you that now is the time to purchase bulbs for the early spring garden you have always resolved to have.

On the pages following you will find a complete list and short descriptions of bulbs for fall planting.

All of our bulbs are of the highest quality and you are assured of success with your spring garden when planting them. We have direct connection with the very best growers in Holland, who supply us bulbs of the very highest quality and strictly No. 1 size.

Owing to the present economic conditions in Europe as well as in this country prices have been reduced considerably, and we are sure that never again will you have an opportunity to buy bulbs of these beautiful spring flowers at such low prices.

We want to thank our old friends and customers for their generous patronage in the past, and wish to assure both old and new friends that your orders will have our very prompt and personal attention.

Very sincerely yours.

GORGEOUS COLOR IN SPRING

Triumph Tulips

Triumph Tulips are a crossing between Darwin Tulips and Single Early Tulips. In the past few years Triumph Tulips have become quite popular among gardeners, who unanimously were elated over their excellent results. Their stems are up to two feet high, and last from ten days to two weeks longer than any other kind. They are very fine for the border and garden on account of their tall, stiff stems and their colors. In Triumph Tulips one can find the shades of the brightest Early Tulips, the soft glows of the Breeder Tulips, and the romantic combination of the two-colored varieties, and the dull gloss of the Darwins. They bloom about the same time as the Darwins and Breeder Tulips and are from 18 to 24 inches high.

Glorious Color in Spring

This class gives us the first bright flowers in Spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright stems make them a very desirable addition to any planting in beds, pathways and similar locations.

Dazzling and Charming Narcissus or Daffodils

The graceful and charming Narcissus or Daffodils are being planted more every year because they are so easy to grow and because the flowers last for several years and will thrive in almost any garden soil. A cool and glossy paper is favorable for naturalizing. For house culturing put 3 to 4 bulbs in a 6 inch pot and set in a cool, well-watered, gradually bring to full height and set plants of fresh air.

Parrot Tulips

Remarkable for their fantastic form and coloring. The flowers are large and each is gracefully cut and tilted with slight recurving petals. They bloom in April and May and are from 18 to 24 inches high. Their colors are a mixture of delightful shades. The Parrot Tulips are a crossing between Darwin Tulips and Single Early Tulips. In the past few years they have become quite popular among gardeners, who unanimously were elated over their excellent results. Their stems are up to two feet high and last from ten days to two weeks longer than any other kind. They are very fine for the border and garden on account of their tall, stiff stems and their colors. In Parrot Tulips one can find the shades of the brightest Early Tulips, the soft glows of the Breeder Tulips, and the romantic combination of the two-colored varieties, and the dull gloss of the Darwins. They bloom about the same time as the Darwins and Breeder Tulips and are from 18 to 24 inches high.

Lily Flowering Tulips

A distinct new and handsome class of Tulips, resulting from the crossing of the Darwin and Breeder Tulips. They bloom at the same time as the Darwins and Breeder Tulips. Their substance is unsurpassable and they last from ten to fifteen days longer than any other kind. They are very bright and make a grand show in the garden and border.

Botanical Tulips and Species

The following Tulips are wild species and are mostly used for rock gardens and borders on account of their size. They are very bright and make a grand show in the garden and border.

Narcissus or Daffodils

The graceful and charming Narcissus or Daffodils are being planted more every year because they are so easy to grow and because the flowers last for several years and will thrive in almost any garden soil. A cool and glossy paper is favorable for naturalizing. For house culturing put 3 to 4 bulbs in a 6 inch pot and set in a cool, well-watered, gradually bring to full height and set plants of fresh air.

Striped and Feathered Byblos Tulips

This Tulip is a most beautiful and unique variety, being both striped and feathered. It is a crossing between Darwin Tulips and Single Early Tulips. In the past few years Triumph Tulips have become quite popular among gardeners, who unanimously were elated over their excellent results. Their stems are up to two feet high, and last from ten days to two weeks longer than any other kind. They are very fine for the border and garden on account of their tall, stiff stems and their colors. In Triumph Tulips one can find the shades of the brightest Early Tulips, the soft glows of the Breeder Tulips, and the romantic combination of the two-colored varieties, and the dull gloss of the Darwins. They bloom about the same time as the Darwins and Breeder Tulips and are from 18 to 24 inches high.

Crocus

Among the earliest to bloom and in spring is this beautiful little flower, lifting its head almost before the snow has disappeared. They bloom in April and May and are from 18 to 24 inches high. Their colors are a mixture of delightful shades.

Cottage Tulips

This beautiful variety is a crossing between Darwin Tulips and Single Early Tulips. It blooms about the same time as the Darwins and Breeder Tulips and are from 18 to 24 inches high. Their colors are a mixture of delightful shades.

DILS. For naturalizing

Paper-White Narcissus

(American Grown)

These very popular flowers of great fragrance are seen

in practically every home during the winter months.

They are easily grown in bowels with gravel and water,

and will bloom the following spring. A few bulbs per

plant will produce many flowers. They are excellent

for naturalizing in flower borders and rock gardens.

Joniqs

These small graceful Narcissi are very much ad-
mired for their graceful, sweet-scented, yellow flowers. They are very satisfactory for outdoors when planted in

large groups or masses, and make splendid edgings to

beds of some of the taller Narcissus. For indoor grow-
ing three or four bulbs should be put up in a

4- or 5-inch pot.

Easter Lilies

(Bermuda Easter Lilies)

These very popular flowers of great fragrance are seen

in practically every home during the winter months.

They are easily grown in bowels with gravel and water,

and will bloom the following spring. A few bulbs per

plant will produce many flowers. They are excellent

for naturalizing in flower borders and rock gardens.

Lilium Regale Lilies

This is one of the most beautiful and hardest Lilies in
cultivation. The large, trumpet-shaped flowers are

snowy white, with a pure yellow center, while the edges

of the petals are slightly tinge of pink. Very fragrant.

Will grow in any garden soil, soil is heavy, place sand around bulb for drainage. Plant 5 to 6 inches

deep and should be covered with straw, leaves or peat

during the winter months.
